Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's amendment filed 28 September 2007 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 4-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Laguitton (US 6,689,478).

Laguitton teaches an immobilization support comprising: on the surface of the support an electrolyte thin film (col. 3, lines 20-25) as an adsorbing film for binding material (col. 3, lines 29-34), wherein the electrolyte thin film comprises alternating layers of a polyanionic thin film and a polycationic thin film (col. 4, lines 50-66) so that the uppermost layer is a polycationic thin film (col. 5, lines 27-28).

Regarding claims 5-8, Laguitton teaches the immobilization support having a binding material that binds to a substance to be detected immobilized to the support (col. 6, lines 1-37) wherein the binding material is a biologically derived material of a protein or nucleic acid (col. 6, lines 19-37).

Response to Arguments

2. Applicant's arguments and amendments with respect to the previous rejections of claims 4-8 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is

made in view of Laguitton teaching an immobilization support with alternating polyanionic and polycationic thin films.

Conclusion

No claims are allowed.
